No 331

Copy sent by Express No. 1166
Dated Bangalore 11th July 1892

From

A. Rangaraoui Esqr Asst Sec. to Govt.
Public Department

To

The Chief Secretary to the
Govt of Bengal

Sir,

I have the honor to submit for the orders of Government the accompanying circular papers coming with the letter from Colonel Standard, report No 83/65 of the 2nd instant 1892.

2. The subject matter of the complaint pertains to the question of the management of the Cauvery and other drainage water of the Cauvery Channel near Kesare which stagnates above the Cauvery Channel without an outlet for the same to escape. Similar questions of drainage and water-courses

of such nature are

assessed at Rs 66-12-11. The above extent for irrigation survey numbers belonging to Kisare village and details thereof are given in the statement attached to the file accompanying.

5. I inspected the Devarai and the Virjanadi Channels in company with the Patildar on the 20th May and found that owing to the extension of the Virjanadi Channel the land water, drainage and the surface drainage of the valley below it are obstructed to escape. They stagnate near the Virjanadi Channel covering an extent of about 3 or 4 acres. When the Virjanadi is in action these waters cannot escape and no cultivation can be successfully carried on. Even when the channel bed is dry the lands are damp and cannot be well drained. The crops have also to suffer a good deal of complaint and disease

consideration. They must also
be required to be constructed so as
to take away the water below the
Virginadi Channel. The cost
of this is estimated at 3 to 4000
Rupees and it is also considered
risky to the safety of the Channel.
Considering the extent of the
land submerged and its value
the remedy is apparently more
costly than the evil.

4. The Executive Engineer pro-
poses that the Land might be
acquired and all round the
waste. This will result only in
a loss of the cost of acquiring
and of the Rent due payable
every year.

5. The evil caused to the
villagers by annual inundation
would be greatly reduced. I think that if
the present high rates were
reduced by one half they will be
satisfied and it will be the best

expensive fail remedies so far as Government is concerned. I would also strongly recommend to Government revision of Irrigation Landagers for the last revenue year (1891-92).

6. At the time of my inspection my attention was drawn to the waste weir to the Devaral Channel which was not protected by a face wall or apron to the ground being considered sufficiently hard enough to stand water from flowing water. Since it has been very much cut up and I am told use that much useful water escapes by this weir to the Cossipaud Lower Reservoir and the damage to the lands between this and Tirgaondi. I have represented this to the Executive Engineer Division for early attention.

I have the honour to be
Sir,
Your most obedient
servant

Dy. Superintendent
Irrigation

Superintendent's Office
Dated Negapatam 4th July 1893

From

A. Rangasami Ayyar Esquire
Acting Commissioner

To

The Chief Secretary to the
Madras Govt

Sir

Adverting to your docket
No 15150 A/4 dated 4th March last
A.J. 92-92, requesting to submit further
report after communicating with the
Superintendent Negapatam Revenue Survey
regarding the reduction of assessment
on certain lands submerged by the
backwaters and other drainage waters
of the Coconad Channel near Kesa-
-ri in the Negapatam Taluk, I have the
honor to submit for your information
Copy of letter No 1129 dated 22d
May 1893 from the Superintendent
Revenue Survey and to state that I
agree with that officer in the opinion

that it is unnecessary to make any
-quick reduction in the Water Rate
and that it would be enough if
Government empower the Deputy
Commissioner to remit half of the
assessment on the lands submerged
by the surplus water during any
portion of the cultivation season
at each annual Jamabandi.

2. As a matter of fact no crops
were cultivated on these lands in the
years 1890-91 and 1891-92 owing to the
stagnation of water and the growth
of reeds as reported by the Mukhtar
and I would recommend for
sanction of Government remission
of one half of the Kamalgam due
on the lands in question for the
years 1890-91 and 1891-92.

3. With regard to the construction
of a weir upon the waste weir of the
channel by the Public Works Department

A reference has been made to the Executive Engineer Ranchi Roads Division and his reply is awaited.

4. The file of connected correspondence in the subject is herewith submitted.

Yours the honorable,
Sir,
Your most obedient
servant
Deputy Commissioner
Ranchi District

Survey Superintendent's Office
Bangalore 22nd May 1893.

To, The District Commissioner,
Kyasanur District

Sir,

I have the honor to acknowledge the receipt of your letter No 2-35 of the 12th instant referring me to record any reason I may wish to make on the subject of correspondence ending with Chief Secretary's docket No 1750 of 92-92 of 14th March 1893 referring to S. No 37 of Kasaba 86-12 and stated to be submerged by the waste weir and other drainage water of the Kemmal Channel was heard and on which consequently the Kyasanur ask for some relief.

2. I cannot in favor of altering the valuation in the Kasaba as I do so would be admit that the causes of impaired cultivation are permanent which so far as I can gather from the correspondence

in each case at any rate exceed one-fifth the area. The land is evidently valuable in spite of this liability, the drainage which the Government is in action. It can doubt will give considerable increase each year the portions really submerged and injured and to permit half or whatever proportion of the full assessment may be considered right but such a course is in my opinion preferable & permanently alienating revenue for which may not be permanent reasons.

3. As to whether the accompaniments of my letter under reply

I have &c
